

A. Application Program Interfaces

This document serves as an **initial blueprint** for the API design currently under development. The primary focus of this design is to define the data structures, and endpoints. Technical details regarding the server-side logic have not been fully implemented, as this document is intended to function as a **design reference** for the development team.

1. PKK Service (BSIMS to N4)

Endpoint Configuration	
Path	/get_pkk
HTTP Method	POST

1.1 Request Header:

Field Name	Required	Required Data
Content-Type	Yes	application/x-www-form-urlencoded
User-Agent	Yes	BACT
AccessKey	Yes	{AccessKey}

1.2 Request Body:

Field Name	Required	Data	
		Type	Length
period	yes	string	~

1.3 Respont Element :

Field Name	Description
status	Request status
code	Response code
message	Message status
data	
nomor_pkk	PKK Number
nama_kapal	Vessel Name
call_sign	Call Sign
tanda_pendaftaran_kapal	Ship Registry No

tanggal_eta	ETA DateTime
tanggal_etd	ETD DateTime
jenis_trayek	jenis_trayek
timestamp	API Timestamp

1.4 Response Example

Successed Response
<pre>{ "response": { "status": 1, "code": 200, "message": "Sukses", "data": { "nomor_pkk": "PKK202601140001", "nama_kapal": "MV OCEAN BREEZE", "call_sign": "YBCD2", "tanda_pendaftaran_kapal": "2024-LL-No.1234/L", "tanggal_eta": "2026-01-20 08:00:00", "tanggal_etd": "2026-01-22 17:00:00", "jenis_trayek": "Liner", "timestamp": "2026-01-22T10:32:49Z" } } }</pre>

1.5 Code Example

2. TRANSPORTATION SERVICE (BSIMS to N4)

Endpoint Configuration	
Path	/get_transportation
HTTP Method POST	POST

2.1 Request Header:

Field Name	Required	Required Data
Content-Type	Yes	application/x-www-form-urlencoded
User-Agent	Yes	BACT
AccessKey	Yes	{AccessKey}

2.2 Request Body:

Field Name	Required	Data	
		Type	Length
jml	yes	string	~

2.3 Response Element :

Field Name	Description
status	Request status
code	Response code
message	Message status
data	
no_kendaraan	Vehicle Number
nama_perusahaan	Company Name
nama_perorangan	Driver/Owner Name
available	available
masa_expired	Permit Expiry Date
timestamp	API Timestamp

2.4 Response Example

Successed Response

```
{
  "status": 1,
  "code": 200,
  "message": "Sukses",
  "data": {
    "no_kendaraan": "BP 1234 XX",
    "nama_perusahaan": "PT Batam Terminal Petikemas",
    "nama_perorangan": "Fikramul Bizli",
    "available": "Available",
    "masa_expired": "2026-12-31",
    "timestamp": "2026-01-22T13:15:00Z"
  }
}
```

2.5 Code Example
